Summary

Software Engineer with 3+ years of experience building scalable full-stack web applications and enterprise platforms using modern JavaScript technologies. Specialized in React.js, Node.js, TypeScript, and MERN stack development with strong expertise in backend architecture, REST APIs, real-time systems, authentication, and database design. Proven track record of delivering production-grade applications across government, enterprise, and startup domains featuring complex workflows, high-performance user experiences, cloud integrations, and scalable system architecture.

Technical Skills

- Languages:** TypeScript, JavaScript, SQL
- Frontend:** React.js, Next.js, Redux Toolkit, Zustand, REST APIs, TailwindCSS, SASS, Mantine UI, Material UI
- Backend:** Node.js, Express.js, REST API Development
- Cloud & Services:** Firebase (Auth, Firestore, Cloud Functions, FCM), Docker
- Tools & DevOps:** Git, GitHub, Firebase Analytics, Jira, Stripe, Shippo, LiveKit, FileZilla, pgAdmin
- Databases:** PostgreSQL, Firestore, MongoDB

Experience

- Stash Technologies**
Software Engineer

 - Architected and developed scalable MERN stack platforms with modular backend architecture, reusable services, and optimized API performance.
 - Designed high-performance REST APIs and complex business workflows using Node.js, Express.js, MongoDB, and PostgreSQL.
 - Led development of enterprise-grade admin panels, reporting systems, and workflow automation platforms handling large-scale operational data.
 - Implemented secure authentication, role-based access control, audit logging, and scalable permission management systems.
 - Optimized backend performance through query optimization, caching strategies, background job processing, and database indexing.
 - Integrated third-party services, cloud infrastructure, and real-time communication systems for production-scale applications.
 - Collaborated with cross-functional teams on architecture planning, code reviews, deployment pipelines, and engineering best practices.
 - Contributed to production deployments, server management, debugging critical issues, and maintaining high application reliability.

Jan 2026 – Present
Islamabad, Pakistan
- Niftonic**
Software Engineer

 - Developed and shipped 5+ production applications using React.js with chat, streaming, payments, and RBAC systems.
 - Built REST APIs, Firebase Cloud Functions, and designed Firestore/PostgreSQL database schemas.
 - Implemented real-time 1:1 and group chat with multimedia support, read receipts, and offline-first architecture.
 - Integrated Stripe subscriptions, webhooks, and admin billing dashboards.
 - Built secure authentication systems with MFA/OTP verification and JWT-based authorization.
 - Integrated third-party services including LiveKit, PostHog, Shippo, and Firebase push notifications.
 - Optimized application performance, reduced bundle size, and mentored junior developers.

May 2023 – Jan 2026
PWD, Islamabad
- LEBS**
Associate Software Engineer

 - Developed full-stack web applications, REST APIs, and MongoDB database solutions.
 - Built responsive React.js admin dashboards and analytics systems.
 - Implemented authentication flows, real-time synchronization, and third-party integrations.
 - Collaborated on architecture planning, API design, and development best practices.

Dec 2022 – May 2023
Remote

Projects

iZiarah Admin Panel | *React 18, TypeScript, React Query, Mantine UI, Google Maps API*

- Architected a modular administrative platform for managing Ziarah locations, agencies, bookings, and transport logistics.
- Integrated Google Maps API for precise geolocation tagging and management of sacred sites.
- Built centralized booking workflows with advanced filtering, status tracking, and operational management tools.
- Implemented secure JWT authentication, optimized server-state synchronization, and scalable frontend architecture.

TDCP Tourism Service Portal | *React 19, Node.js, Express.js, MongoDB, Tailwind CSS*

- Developed a large-scale tourism platform for the Government of Punjab (TDCP) covering Sightseeing, Softwheel, Boating, Fleet, Chairlift, and Cable Car services.
- Engineered scalable frontend and backend systems for booking workflows, fleet scheduling, and dynamic content delivery.
- Designed service-specific user experiences while maintaining a unified design system across all tourism modules.
- Optimized application performance and API efficiency for high-traffic tourism operations.

Dungeons Not Dating | *React.js, Firebase, Cloud Functions, Auth, Real-time Chat*

- Developed matchmaking platform with dual-role system (Character and Dungeon Master) featuring profile authentication and MFA via SMS OTP.
- Built real-time messaging system with 1:1 and group chat, multimedia support, read receipts, and admin privilege handling using Firestore.
- Implemented Firebase Cloud Functions for automated cleanup workflows, availability logic, and data consistency checks.
- Created React.js admin portal for moderation, analytics, and user management operations.

TreeTalk Therapy | *React.js, Firebase, Cloud Functions, Mantine UI, Stripe, Shippo*

- Built e-commerce and therapy platform with Stripe subscription management and Shippo shipping integration.
- Developed role-based access control system with conditional routing and platform-specific authorization logic.
- Implemented automated Cloud Functions for therapist document expiry checks and access enforcement workflows.

BiDR | *React.js, TypeScript, GraphQL, AWS AppSync, AWS Lambda, LiveKit*

- Architected real-time auction platform with live bidding, automated winner selection, and complete buyer/seller transaction workflows.
- Integrated LiveKit for real-time video streaming and interactive communication features.
- Designed scalable GraphQL APIs with AWS AppSync and Lambda-based event-driven backend architecture.

Skribr | *React.js, Node.js, Firebase*

- Designed and developed school management platform with student performance tracking and administration modules.
- Built scholarship and badge assignment algorithms based on academic performance metrics.
- Integrated document upload workflows, profile analytics, and responsive frontend systems using React.js.

PTF (Pakistan Tennis Foundation) | *React.js, Node.js, MongoDB, Express.js*

- Developed court booking and scheduling platform to automate reservation workflows for tennis facilities.
- Engineered slot calculation algorithms for optimized court allocation and booking management.
- Built role-based administrative dashboard for centralized operational and user management.

Education

PMAS Arid Agriculture Rawalpindi

Bachelor of Science in Computer Science (GPA: 3.82 / 4.00)

Sept 2019 – July 2023

Rawalpindi, Punjab
